Employer Engagement – this group is centred around engaging with employers and assisting them to upskill those already employed and identify opportunities for employers for example National initiatives and incentives.

Welfare Reforms – the key aim of this group is to provide information and support on the Welfare Reforms including Universal Credit. Through this group it is hoped that the change to existing benefits will be a transparent process.

Performance – This group supports the monitoring of existing employability provision in Angus and across Scotland. Providing statistics on current provision highlights areas of good practice and improvement areas.

Youth Employment – The youth employment group is working to support the transition of young people from school to work. It is the aim in Angus that every young person has a positive destination after leaving school and this is supported through the partnership working on this group.

The Scottish Government’s Employability team have been working with employability partnerships and community planning colleagues to develop an Employability Learning Network (ELN), in order to help build the capacity of delivery partners. The ELN takes a demand-led approach so that it undertakes activity which meets the needs of those trying to deliver on these issues within local areas.

A national employability website has been established, which acts as a portal for good practice, research, publications, tools and case studies.

For more information contact Economic Development on 01307 473198 or visit www.angusahead.com/angusworks

For further information on the ELN please contact joanne.farrow@scotland.gsi.gov.uk
